

SoundSync

Team 6

Dongyun, Sol, Suhyun, Yuna, Taein
Abshira, Nolan, Taylor, Tony, Wayne

Project Goal

1. real-time traffic tracking
2. safety reinforcement
3. user convenience improvement
4. information gap reduction

Target

Uncertainty
Averse
Daily
Commuters

Key Features

live bus
monitoring

unified
alert system

smart
arrival

Pain Points & Gain Points

Ghost Buses: Unpredictable Commutes

Sensor Gaps: Informational Blind Spots

Legacy Limitations: Stagnant User Experience

P.P

G.P

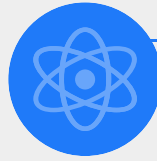

Certainty Delivered
Psychological Stability
Peace of Mind

Precision Control
Data-Driven Dispatch
Optimization

Operational Excellence
Significant Reduction
in Public Complaints

Value Creation
DData Assetization
& Revenue Generation

Key Functions

AI-Driven Route Planning

Predictive pathfinding
for optimized travel.

Precision Transfer Forecasting

Accurate arrival and
waiting time estimates.

Data Fusion Strategy

Integrating real-time crowdsourced data
with AI to deliver optimal transit solutions.

Business Model

Ad-Based Revenue:

Instant updates on accidents,
construction, and large-scale events.

+

Ecosystem Reinvestment:

User-driven reporting ensures reliability
even during sensor failures.

+

B2G Data Sales:

Monetizing high-fidelity transit metrics
for government urban planning.

We drive local engagement via rewards
and ads, **while transforming user data
into insights for smarter cities.**

Competitive Edge

Agile Incident Response:

Instant updates on accidents,
construction, and large-scale events.

Uninterrupted Service:

User-driven reporting ensures reliability
even during sensor failures.

Agile Incident Response:

In Eliminating "blind spots"
that legacy platforms often miss.

From Feedback to Action

Need for
Differentiation

Distinctive
Value
Propositions

Crowd
sourcing

Combining AI
with Real-Time,
Crowdsourced
Passenger Data.

Progress Over Perfection . . .

SoundSync

Team 6

Dongyun, Sol, Suhyun, Yuna, Taein
Abshira, Nolan, Taylor, Tony, Wayne

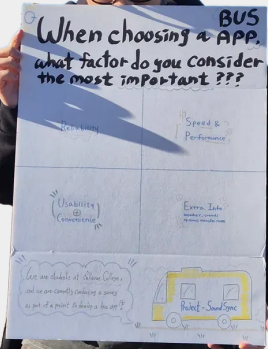

Jan 17

We went out to downtown Bellevue and conducted an **offline survey**.

We researched what citizens consider the most important when choosing a **public transportation app**.

As a result, we have obtained data that it is of utmost importance that **reliable information** is provided.

Jan 18

We conducted an interview with BI Data Scientist Michael Williams. Based on insights from him, we enhanced the **prototype's real-time data collection and accuracy**.

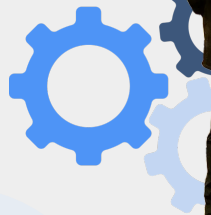

We also conducted an **online survey** of **27 Bellevue College students** regarding their experiences while using public transportation.

Gantt Chart

Our team has gone through a journey to fully understand **Seattle's transportation problems** and truly seek **solutions for its citizens**.

Task Name	2025		2026						
	Nov W4	Dec W1	Dec W2	Dec W3	Dec W4	Jan W1	Jan W2	Jan W3	Jan W4
Planning									
Market Analysis									
System Design									
Implementation									
Field Research									
Final Delivery									

As a result, the first act of the **SoundSync** project was successfully completed through **cooperation with the team members**.

Team 6's Project Journey . . .
